

Demonstration of Proposed Features

Date	11 July 2026
Team ID	
Project Name	Rising waters - Flood Prediction using Machine Learning
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Input Form	Allows users to enter weather and rainfall parameters	Implemented	Yes	Working successfully
2	Flood Prediction Model	Predicts flood likelihood using Random Forest ML model	Implemented	Yes	Accurate predictions generated
3	Input Validation	Validates user inputs before prediction	Implemented	Yes	Prevents invalid data
4	Prediction Result Display	Displays "Flood Likely" or "No Flood" instantly	Implemented	Yes	Real-time output
5	Flask Backend Integration	Connects frontend with trained ML model	Implemented	Yes	Successfully integrated
6	Responsive Web Interface	Simple and user-friendly interface for prediction	Implemented	Yes	Easy to use

Feature Implementation Summary:

Metric	Count/Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
