

Project Demo Planning

Date	11 July 2026
Team ID	
Project Name	Rising waters - Flood Prediction using Machine Learning
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objective, and problem statement	2	Manikyam Kuppam (Team Lead)
2	System Architecture	Explain the ML model, Flask backend, and overall workflow	3	Uttam Bhimavaram
3	Live Demonstration	Enter weather parameters and show flood prediction results	4	Sai Lohitha
4	Dataset & Model	Explain dataset, preprocessing, and Random Forest model	2	Uttam Bhimavaram
5	Testing & Results	Show prediction accuracy, screenshots, and performance	2	Srivarshini Chitte
6	Conclusion & Future Scope	Summarize the project and discuss future improvements	2	Thadi Muniramteja

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain why flood prediction is important and project objectives
2	Solution Overview	Describe system architecture, technologies used, and ML workflow
3	Live Feature Demonstration	Launch the Flask application, enter sample weather values, and display the prediction result.
4	Q&A Session	Answer evaluator questions and explain future enhancements.
